Structure of the Edexcel Chemistry 2014 Mark Scheme

Components of the Mark Scheme

The mark scheme generally consists of the following components:

- **Question-specific marking criteria:** Each question or part of a question is broken down into specific points that merit marks. These criteria specify what constitutes a correct or complete answer.
- **Level descriptors:** For longer, more complex questions, the mark scheme often includes descriptors that define different levels of response quality, from basic understanding to excellent analysis.
- **Mark allocation:** The number of marks available for each part of the question guides students on the expected depth of answer.
- **Common misconceptions:** The scheme may highlight typical errors to be cautious of or common incorrect responses that do not merit marks.

How Mark Schemes Are Applied

Examiners use the scheme to evaluate student responses systematically, awarding marks based on:

- Accuracy and correctness of facts.
- Clarity and logical progression of ideas.
- Application of relevant chemical principles.
- Use of appropriate terminology and scientific language.

Partial marks are awarded for responses that demonstrate some understanding, even if incomplete or partially incorrect. The scheme ensures that students are rewarded proportionally to their demonstrated knowledge and skills.

Key Topics Covered in the 2014 Mark Scheme
